- Al Faseel
- Al Gurfa
- Sakamkam
- Al Fujairah Marina
- Al Aqah
- Al Hayl
- Masafi
- Al Bithnah

### Other Fujairah Areas

- Dibba Al Fujairah
  - Qidfa
  - Khor Kalba
- 

## Data Structure Recommendations

For your database implementation, consider this hierarchical structure:

Emirates (7)

└── Major Cities/Districts

└── Areas/Neighborhoods

└── Communities/Sub-areas

└── Streets/Roads

### Suggested Database Fields:

- **emirate\_id** (1-7)
- **emirate\_name** (Abu Dhabi, Dubai, etc.)
- **city\_area** (Major district/city)
- **neighborhood** (Specific area)
- **community** (Sub-area/development name)
- **is\_active** (for future additions/changes)

### Notes for Implementation:

1. **Dubai** has the most complex structure with multiple sub-areas
2. **Abu Dhabi** includes both city and other major towns
3. Some areas span multiple emirates (like Al Nahda - shared by Dubai & Sharjah)
4. New developments are constantly being added, especially in Dubai and Abu Dhabi
5. Consider adding Arabic names for better local recognition

This list provides a solid foundation for your customer database. You may want to validate specific communities with local knowledge as new developments are frequently added.
