

EITS Site Inspector Dashboard User Guide

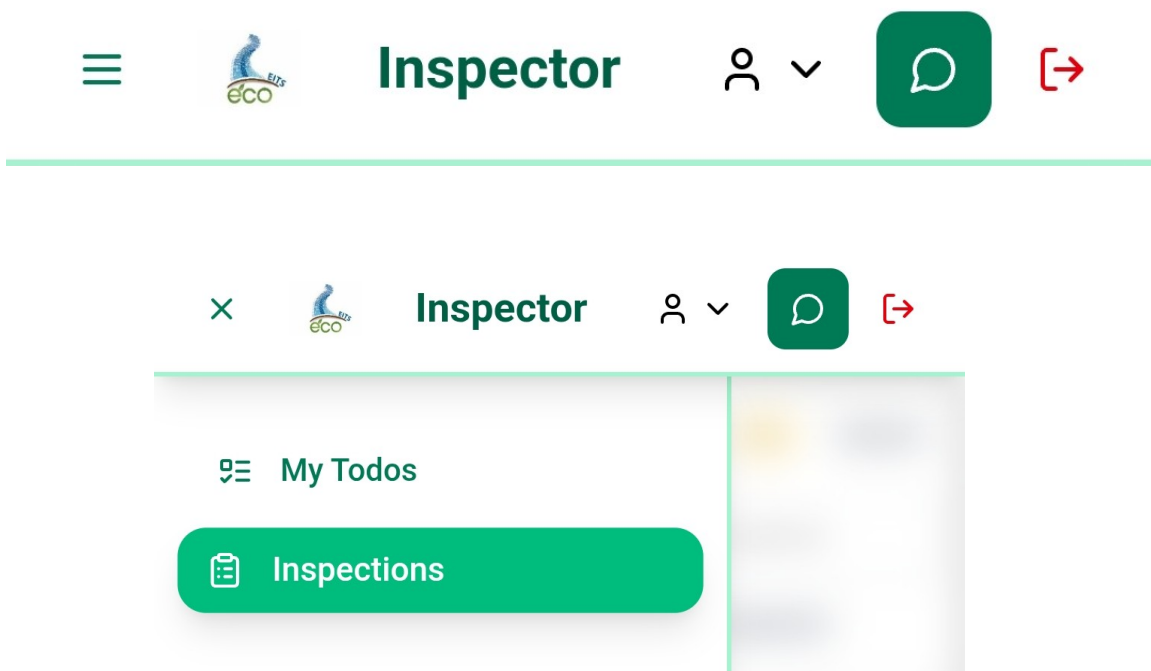

1. Overview

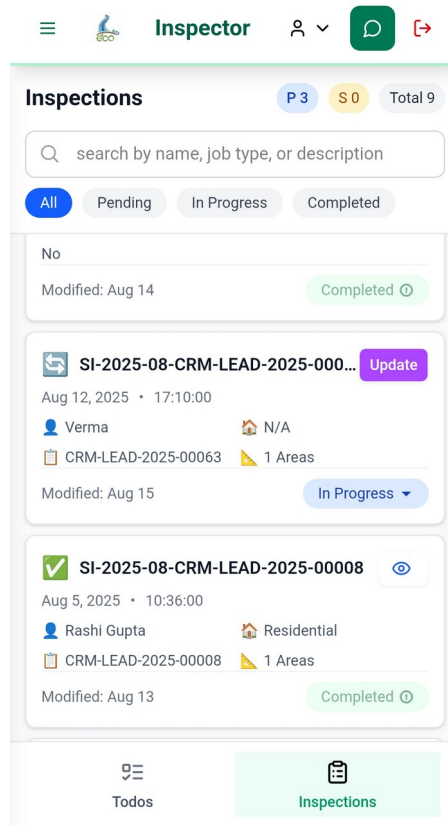

The Site Inspector Dashboard allows inspectors to organize the site data at one place so that it can be easily accessible and the client receive the best services. It allows Site Inspector to:

- Record and manage site-related information
- Upload photos, audio notes, and measurements
- Track work progress using status cards

How To Open Main Inspection Page?

- First click on Hamburger Icon
- Then Click on Inspections button

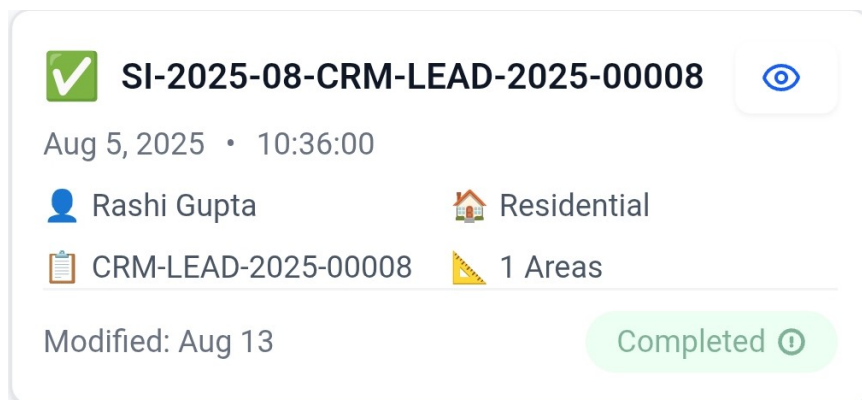

2. Dashboard Structure

Types of Cards

There are two types of Cards one is the working card and another is the site inspection is completed

- Working Card – Displays ongoing tasks. Inspectors can update the progress of site activities.
- Completed Card – Shows finished tasks and inspection details.

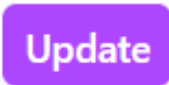

Completed Card

Update Button

When you click the Update button, you can:

- View inspection details
- Check upcoming site visit schedules
- Modify progress and related notes

 CRM-LEAD-2025-00063  1 Areas

Modified: Aug 15 

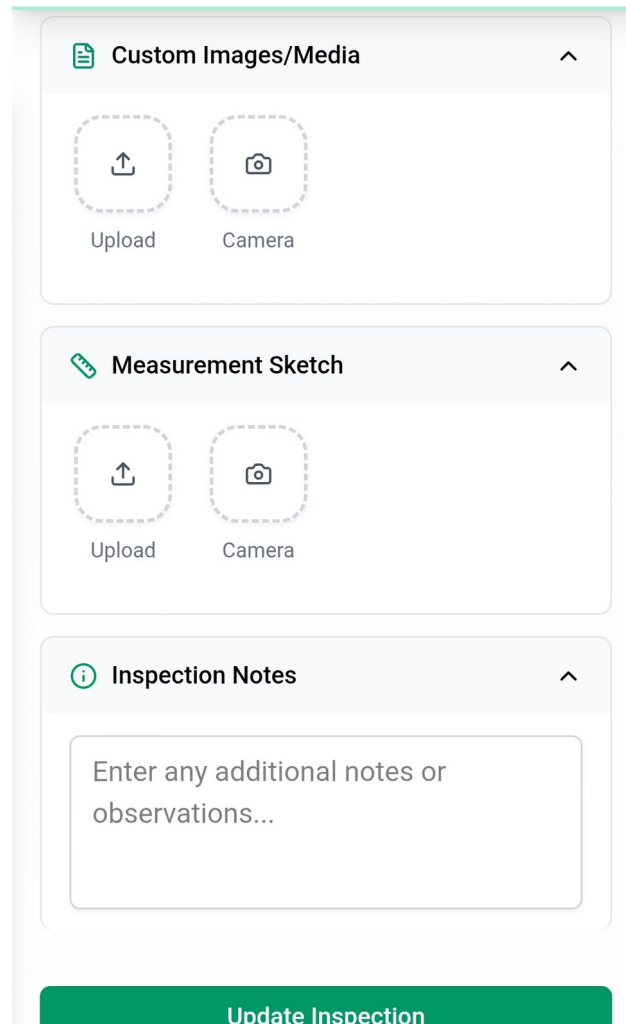

- The second card is the work is in progress or other steps.
- Now Site inspector can change the work process by Selecting the following steps.

4. Custom Media & Sketches

- Upload additional images for reference
- Add custom sketches to represent dimensions or work areas
- Attach media files to support inspection reports

The image shows a mobile application interface with three main sections. The first section, titled 'Custom Images/Media', contains two buttons: 'Upload' (with an upward arrow icon) and 'Camera' (with a camera icon). The second section, titled 'Measurement Sketch', also contains 'Upload' and 'Camera' buttons. The third section, titled 'Inspection Notes', features a text input field with the placeholder text 'Enter any additional notes or observations...'. At the bottom of the screen is a green button labeled 'Update Inspection'.

5. Key Benefits

- ✓ Centralized storage of inspection details
- ✓ Easy progress tracking with status cards
- ✓ Visual documentation with photos, sketches, and voice notes
- ✓ Clear inspection timelines and site visit planning
